Journal of Crystal Growth 206 (1999) 349–350

JOURNAL OF CRYSTAL GROWTH

www.elsevier.nl/locate/jcrysgro

Subject index

Apparatus
– by floating zone technique 230

Cellular growth
– of potassium niobate 81
Computer simulation
– of melt flow 27
– of transient effects 37
Convection 23, 27, 37, 81, 119, 203

Dendritic growth
– of succinonitrile 215
Device characterization
– electronic materials 271
– heterojunctions 166
– quantum wells 15, 166, 287

Electronic materials, see Device characterization
Epitaxy, see Thin film growth
Etching
– chemical 187
– photolithographic 187

Heterojunctions, see Device characterization
Hydrodynamics, see Convection

Kinetics
– of growth 1, 99, 109, 147, 171, 177, 299
– of interface control 252, 299
– of nucleation 99, 299

Lasers, crystals for
– neodymium gadolinium yttrium aluminum borate 249
– sodium bismuth tungstate 60

Melt growth technique
– by Bridgman–Stockbarger method
– – of cadmium zinc telluride 37
– – of gallium antimonide 159
– by Czochralski method
– – of neodymium gadolinium calcium borate 197
– – of sodium bismuth tungstate 60
– by floating zone method
– – of silicon 23, 27
– – of strontium copper borate 65
Microgravity, growth under
– of potassium niobate 81
– of succinonitrile 331
Morphological stability
– of cerous carbonate 88
– of dendrites 141, 322, 331
– of potassium manganese sulphate 93

Nucleation
– of phosphates 308
– of quartz, diamond and aluminum hydride 75
Numbers
– Grashof 37
– Peclet 37, 331

Solid growth technique
– by casting 119
Solution growth technique
– by chemical bath method 68
– by concentration gradient method 155
– by flux method
– – of neodymium gadolinium yttrium aluminum borate 249
– – of potassium stannate arsenate 245
– by hydrothermal method
– – of beryl 203
Stefan problem or moving boundary problem
– of cadmium zinc telluride 37
– of needle crystals 331
Surface structure
– of potassium hydrophosphate 252

Thin film growth, epitaxy
– by molecular beam epitaxy
– – of aluminum gallium arsenide 267
– – of gallium arsenide 171
– – of gallium nitride 147
– – of hexaphenyl 135
– – of indium gallium arsenide 15, 279, 287
– – of indium gallium arsenide phosphide 15
– – of indium gallium nitride 147
– by vapor phase epitaxy
– – through chemical vapor deposition
– – – of silicon 177
